UltraZonic is expanding very quickly and we're looking for a right hand to assist our R&D manager. (or left, we don't discriminate.) As we're a start-up, providing the **most advanced medical cleaning devices**, you get the chance to help us write this unique story. Trust us, unique it certainly is as we've designed the first medical device worldwide that can pre-clean endoscopes half-automatically. As **innovation** runs through UltaZonic's DNA, we're constantly launching **new technologies** and devices that take **patient safety to the next level**. So far, for this little introduction... Let's talk business, shall we:

Are you the new, **enthusiastic co-writer** in our road towards international success? Providing the **360° technical and administrative service** customers desire and deserve? Then please read on and check if you can tick tick tick all the boxes.

- You know you don't need a compass to **read an electrical plan**? Marvelous, please do read on!
- **#wanderlust** #globetrotter #instatravel **#traveltheworld** #adventure #travelholic Maybe we're exaggerating a little bit with these hashtags, but the point is that you'll always need to keep your suitcase nearby. UltraZonic's devices are finding their way abroad and as a service technician you're duty is to **meet customers' demands both nationally and internationally.** You're flexible to **go abroad** for both **installations and interventions**.
- The passion for **technical perfection** doesn't only flows through your veins, but you also like to let it flow through our machines. (With the right dose of amps of course).
- «Un instant, je vous donne ma collegue. » All right Harry, listen up: 1st : we're not giving away one of our much appreciated colleagues.
 We'd really love to keep them, you see.
 2nd: to avoid language blunders such as these, we expect **complete bilingualism**. This is because our customers are distributed throughout Belgium. (FR-NL)
- You (serial or parallel) switch effortlessly between **office work and on the field services.**
- > You can help write new processes. (Manuals, parts lists,...) Therefore, your communication skills are on point (both written and spoken). If you can create technical drawings, it's a plus.
- You have a **technical degree** in **electromechanics/industrial engineer/**. Preverably bachelor level. This is not a must though. (If you have an additional diploma as a barista, plus points will be given. We just love our caffeine shot in the morning.)
- Your **work enthusiasm** is running at full speed on a daily basis (without short-circuiting if possible).
- Lego and Knex had no secrets for you as a kid? Great! Time to integrate those childhood skills into your job package as you will be **assembling our devices**. (But please do not chew on these components though. They're quite expensive).
- You're **flexible.** It ain't over `till it's over.
- Teamwork makes the dream work. You're a **team player** that likes to show off his inner Ronaldo on a daily basis. (Read: you're perfectly capable of making your own goals. Translated: **You can work individually.** The Ronaldo excessive self-esteem isn't a must though...)
- No experience? No problem. An **eagerness to learn** takes precedence over a lavish resume.

Sounds like your kind of job? Send your full resume and a motivational letter to **ns@ultrazonic.com** with the subject 'sollicitatie service engineer'

As a technical engineer you will be practising a **versatile job** (on site working space combined with national/international visite). Working hours are from **8u00-16u30**. Together with a nice, dynamic team you will contribute to the success of our company. We offer you a salary based on your competences, supplemented with the usual **fringe benefits**. To top it all off, you will be able to enjoy **12 extra free days** due to your 40 hours week(ADV).
